

Dial Test Indicators

- All test indicators are magnetic proof and have jeweled bearings
- Stainless steel stylus lever is detachable with easy screw mount
- Contact point is made of carbide for minimum wear
- Contact point can be set at any angle within 200° adjustment
- Compact size, light weight, durable and vibration proof
- Low pressure contact for measuring thin materials
- Miniature bearing at rotating axle ensures stable reading
- Auto clutch eliminates a bias lever. Point moves freely in both directions
- Contact point can be set within 230° adjustment
